PROFILE

Passionate React Developer with hands-on experience building personal projects using React, JavaScript, and modern front-end tools. Eager to apply strong problem-solving skills and creativity to deliver engaging, high-performance web applications.

SKILLS

- | | | | |
|---------------|---------------------|-------------------|-------------------------|
| - React.js | - JavaScript (ES6+) | - typescript | - HTML5 |
| - CSS3 | - Context API | - React Router | - Redux-toolkit |
| - React Hooks | - Git | - GitHub | - TanStack/ react Query |
| - Firebase | - supabase | - Tailwind CSS | - Responsive Design |
| - npm | - Vite | - RESTful APIs | - VS code |
| - JSON | - Fetch / Axios | - Chrome DevTools | |

PROJECTS

moniq 🔗

05/2026 –
06/2026

Moniq is a modern personal finance and expense tracking application designed to help users monitor their income, expenses, and financial habits through analytics and interactive visualizations. The platform allows users to track transactions, analyze spending behavior, and manage their budget more effectively.

Zikry 🔗

10/2025 –
11/2025

This Islamic supplications management website allows you to add your favorite supplications in one place, without having to visit multiple locations each day

A modern web application developed with React.js with RTK and React Router that enables users to collect, manage and access their favorite Islamic supplications in one central place. By consolidating daily prayers, dhikr and invocations into a unified interface, Zikry saves users the time and effort of visiting multiple sources each day.

Food E-Commerce website 🔗

11/2025 –
11/2025

It is an e-commerce website that work as a restaurant, allowing users to shop for various foods dishes online

This is an e-commerce website for a restaurant, developed using React. We utilized several important libraries such as React Router, Redux Toolkit, and React-Hook-Form, as well as secondary libraries like react-hot-toast and dotlottie-react. The website is built using a custom API to handle all the delicious dishes and supports the Auth system

SparkChat

12/2025 –
12/2025

It is a simple online chat site that uses Firebase for live updates.

Developed a real-time chat application using React.js. The app enables users to send and receive messages instantly without page reloads, utilizing React Hooks such as `useState` and `useEffect` for state management. The project follows a component-based architecture, focuses on clean UI design, and demonstrates strong understanding of modern frontend development practices.

EDUCATION

Tanta University

10/2022 –
06/2026
Tanta

Bachelor's Degree, Computer Science

I am a final-year Computer Science student at the Faculty of Computers and Information, Tanta University, specializing in core computer science courses. I have a strong interest in Frontend Development and focus on studying and building interactive user interfaces using modern web technologies. My studies and personal projects have helped me gain practical skills in creating responsive and user-friendly applications.

- Data Structures
- Web Development
- Software Engineering
- Human-Computer Interaction

CERTIFICATES

Web design

Completed a web development course at NTI, gaining hands-on experience in HTML, CSS, and JavaScript, and building foundational skills for creating responsive and interactive web interfaces skills:

- HTML
- CSS3
- JS

MEAN Stack

Attended a short MEAN Stack course to gain an overview of web development frameworks and concepts. Acquired foundational knowledge in:

- MongoDB
- Express.js
- Angular
- Node.js
- general web development principles

LANGUAGES

Arabic — Native/Bilingual

English — Proficient
